EXPERIMENT-11

Deploying a Zoho Creator Application from Development to Production Environment

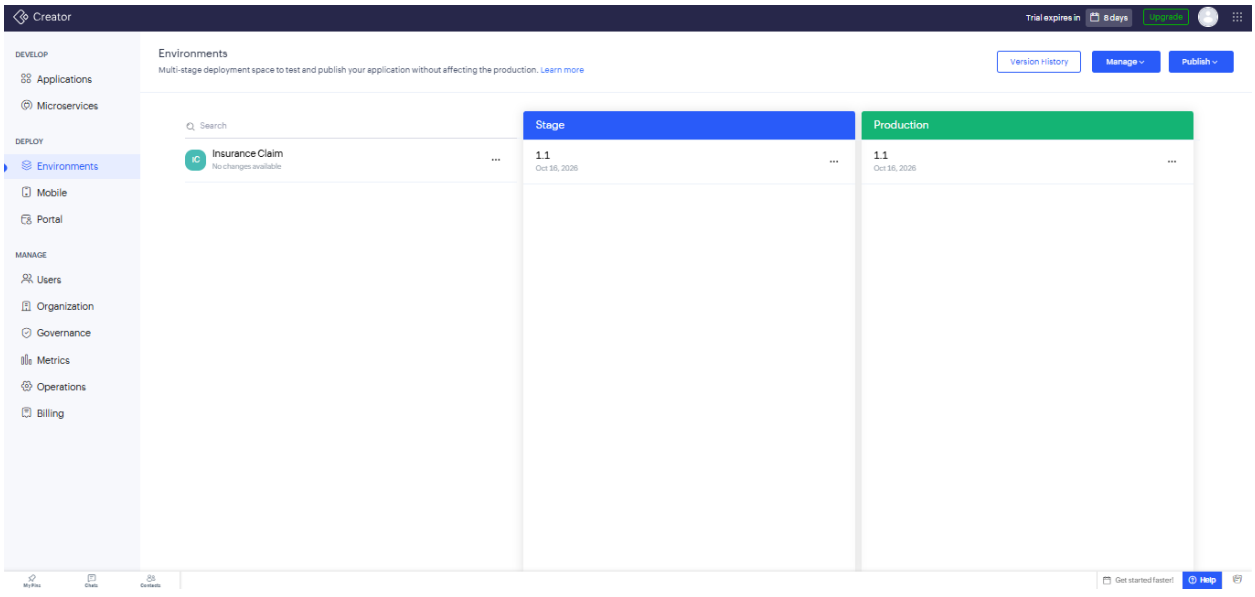

Aim:

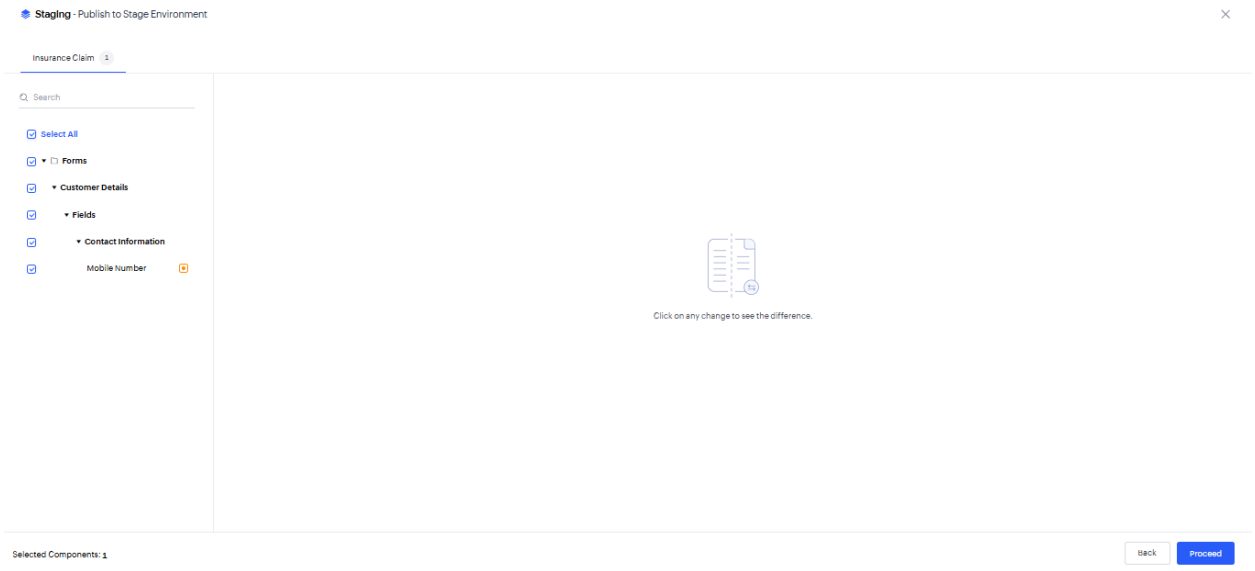

To deploy the Zoho Creator Insurance Claim application from the Development environment to the Stage and Production environments and verify the deployment process.

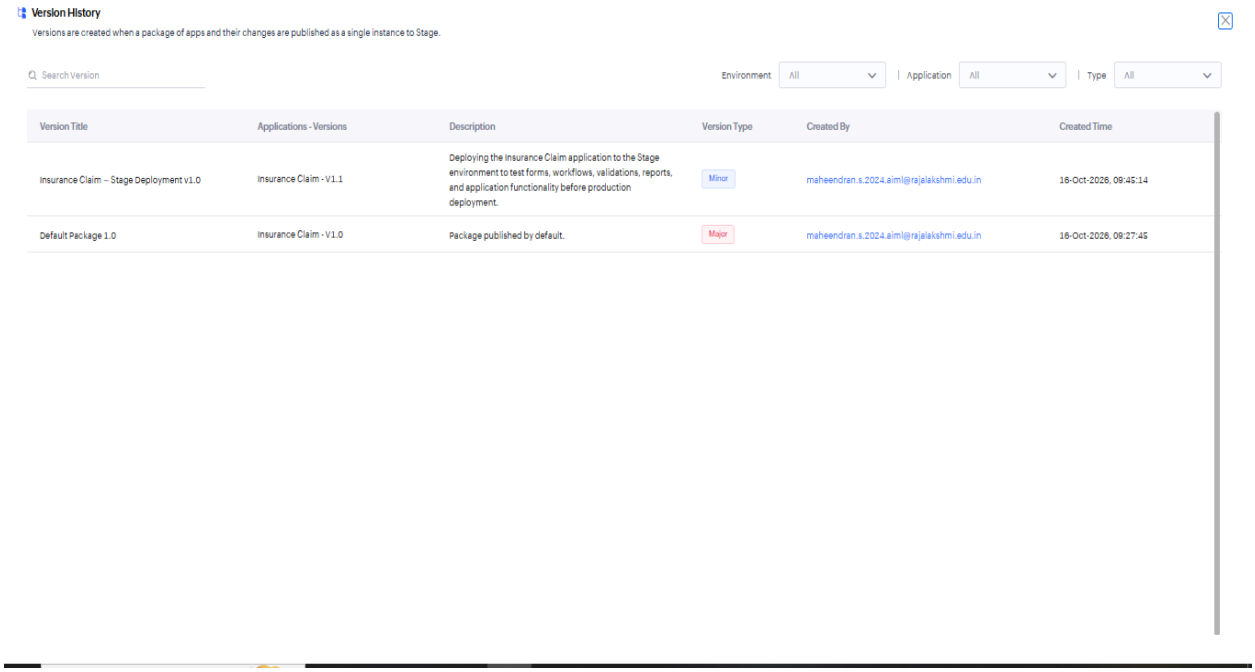

Algorithm:

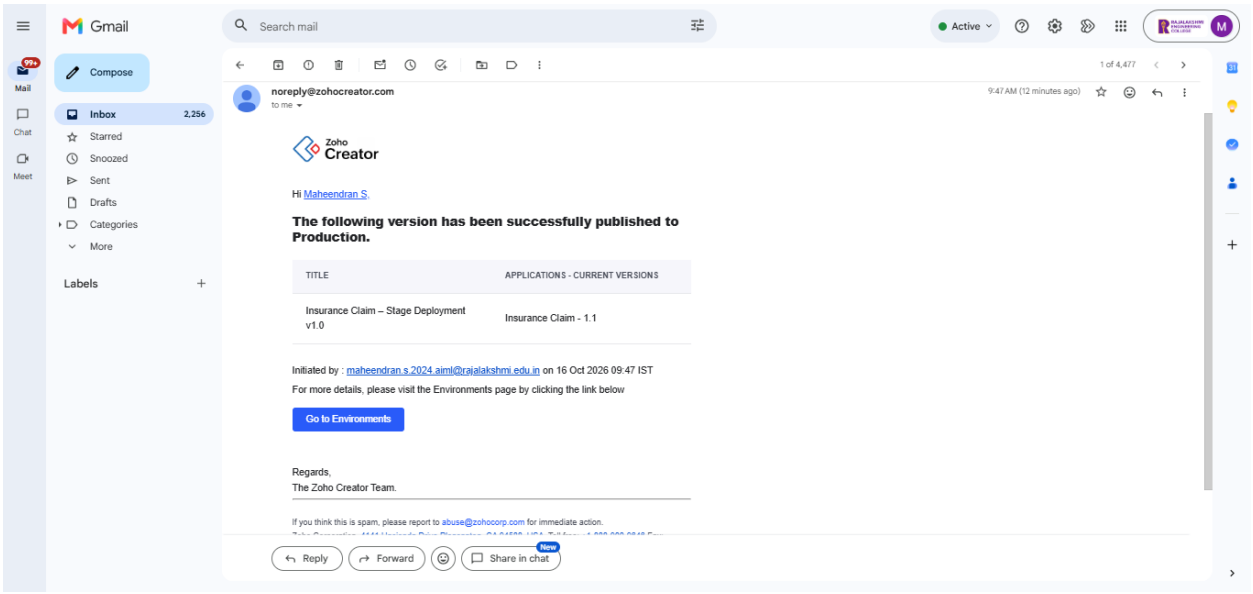

1. Open Zoho Creator and select the Insurance Claim application.
2. Navigate to the Environments section.
3. Review the application in the Development environment.
4. Make and save the required changes in the application.
5. Select **Publish → Publish to Stage**.
6. Select the application components to be published.
7. Enter the version title and description.
8. Select the appropriate version type and publish the application to Stage.
9. Verify the successful publication of version 1.1 in Stage.
10. Test the forms, workflows, validations, reports, and dashboard in Stage.
11. Select **Publish → Publish to Production**.
12. Complete the publishing process and verify the successful publication of version 1.1 in Production.
13. Check the production application to ensure that its functionalities work correctly.

Output:

Staging - Publish to Stage Environment
Insurance Claim 1
