EXPERIMENT-5A

Insurance Claim Reports in Zoho Creator

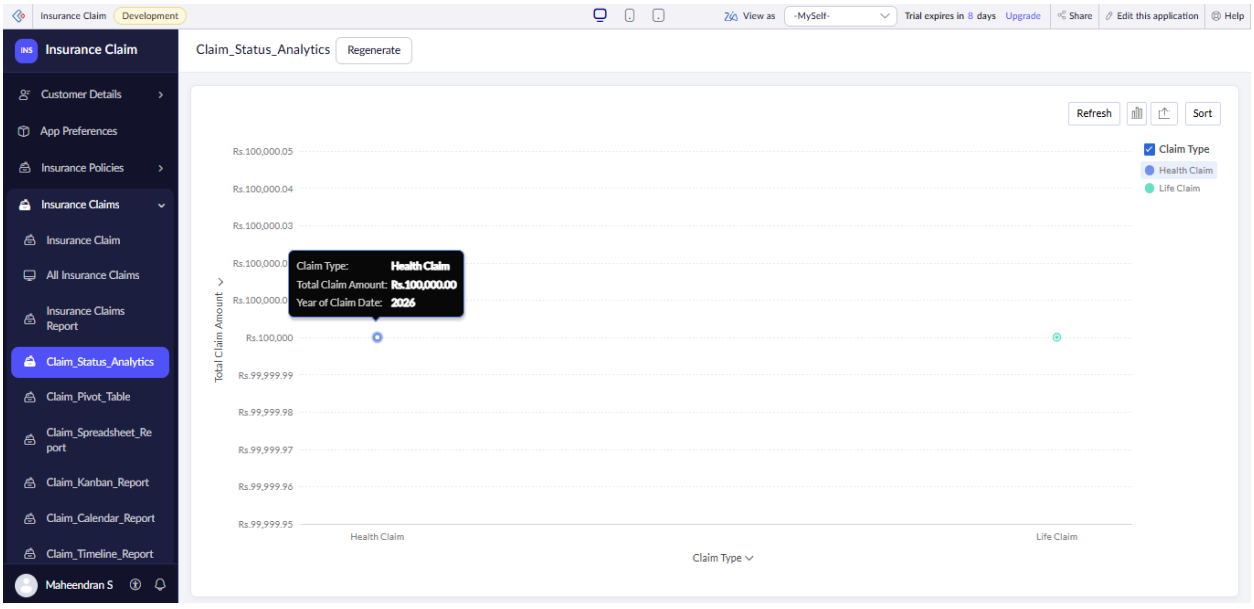

Aim:

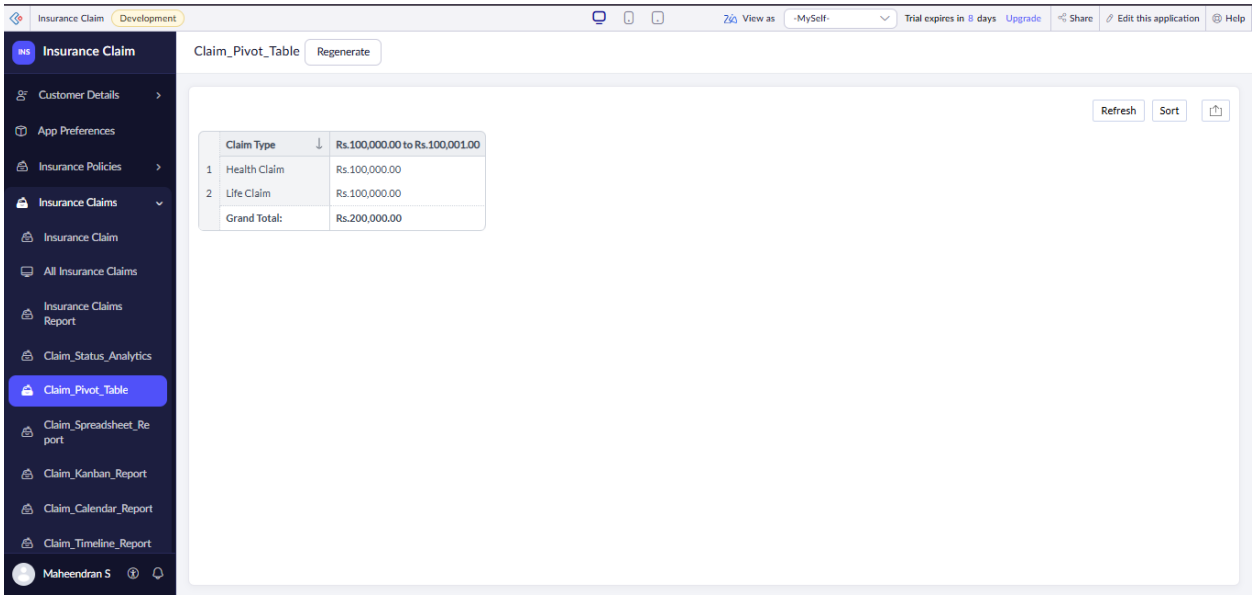

To create and configure different types of reports in the Zoho Creator Insurance Claim application to organize, summarize, visualize, and analyze insurance claim and customer data.

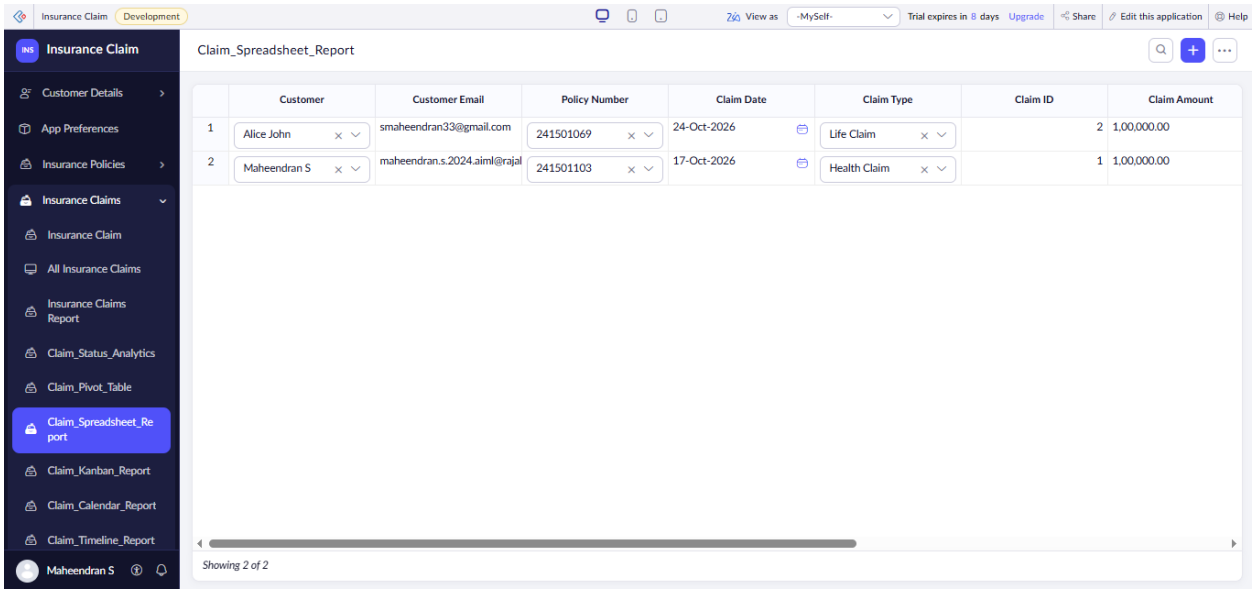

Algorithm:

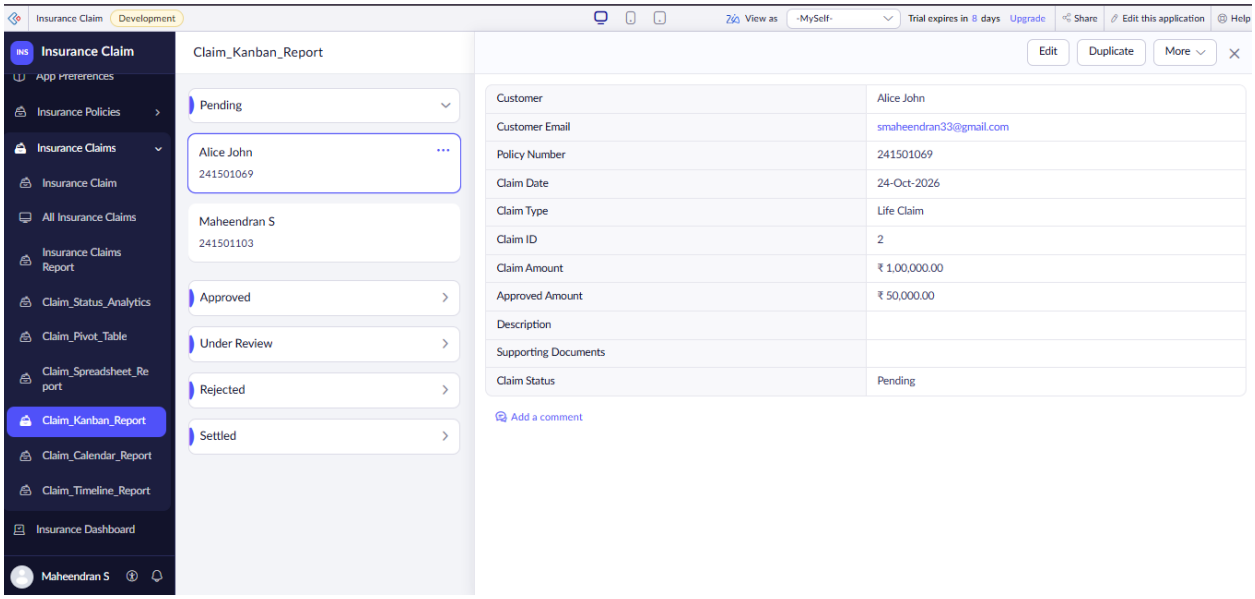

1. Open Zoho Creator and select the Insurance Claim application.
2. Navigate to the Reports section and choose the option to create a new report.
3. Create a **List Report** to display insurance claim records in tabular form.
4. Create a **Pivot Chart** to visualize claim amounts by claim type.
5. Create a **Pivot Table** to summarize claim data by type and status.
6. Create a **Spreadsheet Report** to view claim records in rows and columns.
7. Create a **Kanban Report** to organize claims into status-based cards.
8. Create a **Calendar Report** to display claims according to their dates.
9. Create a **Timeline Report** to view claim records chronologically.
10. Create a **Map Report** using supported customer address or location fields.
11. Save each report with an appropriate name and configuration.
12. Open and verify the reports to ensure that the available data is displayed correctly.
