EXPERIMENT-8

User Management and Role-Based Access Control (RBAC)

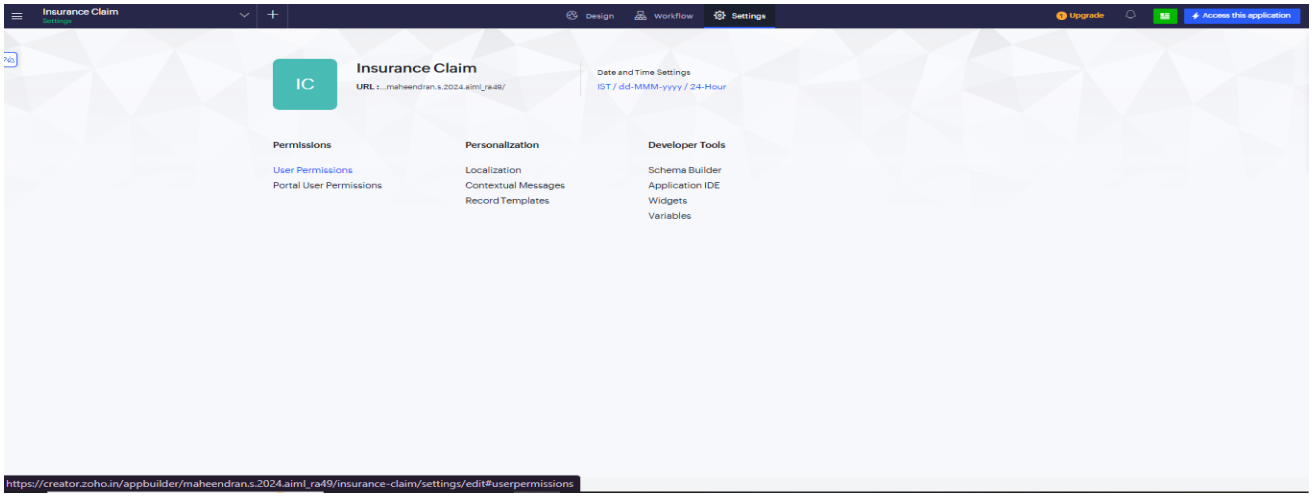

Aim

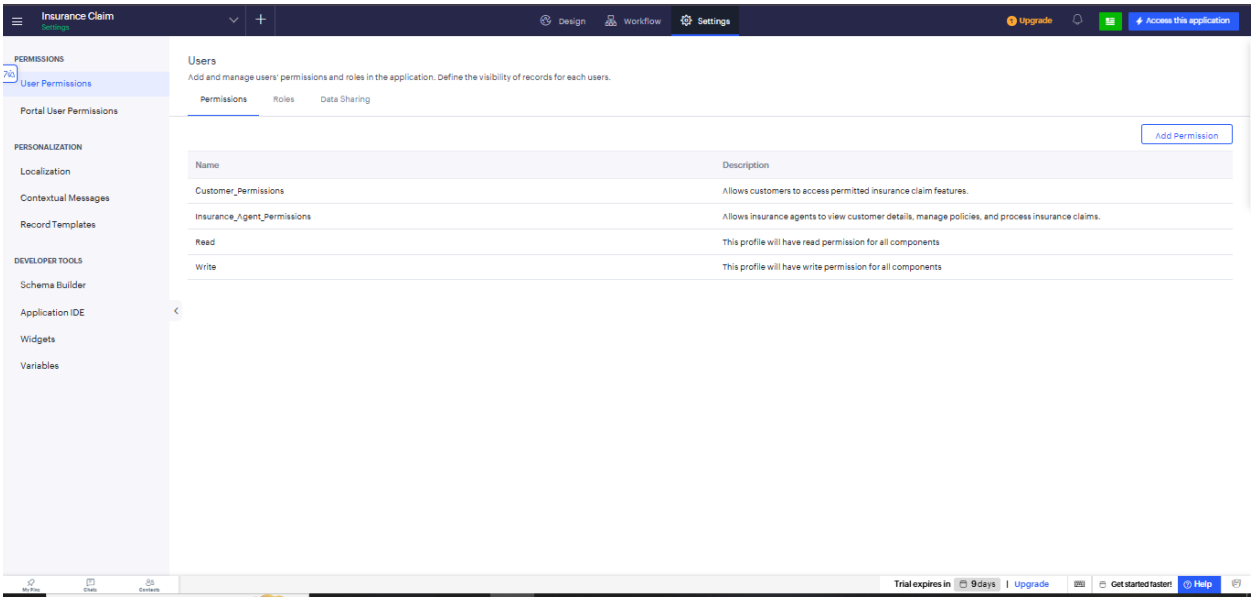

To configure user management and implement Role-Based Access Control (RBAC) in a Zoho Creator application by assigning roles, permissions, and data-sharing rules to different users.

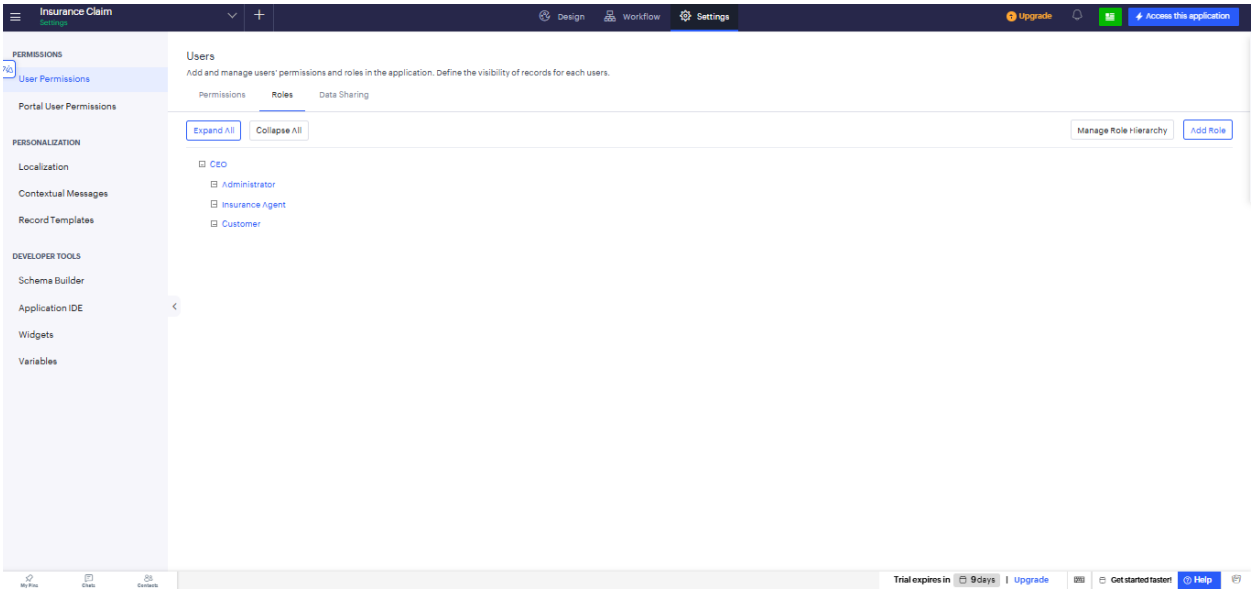

Algorithm

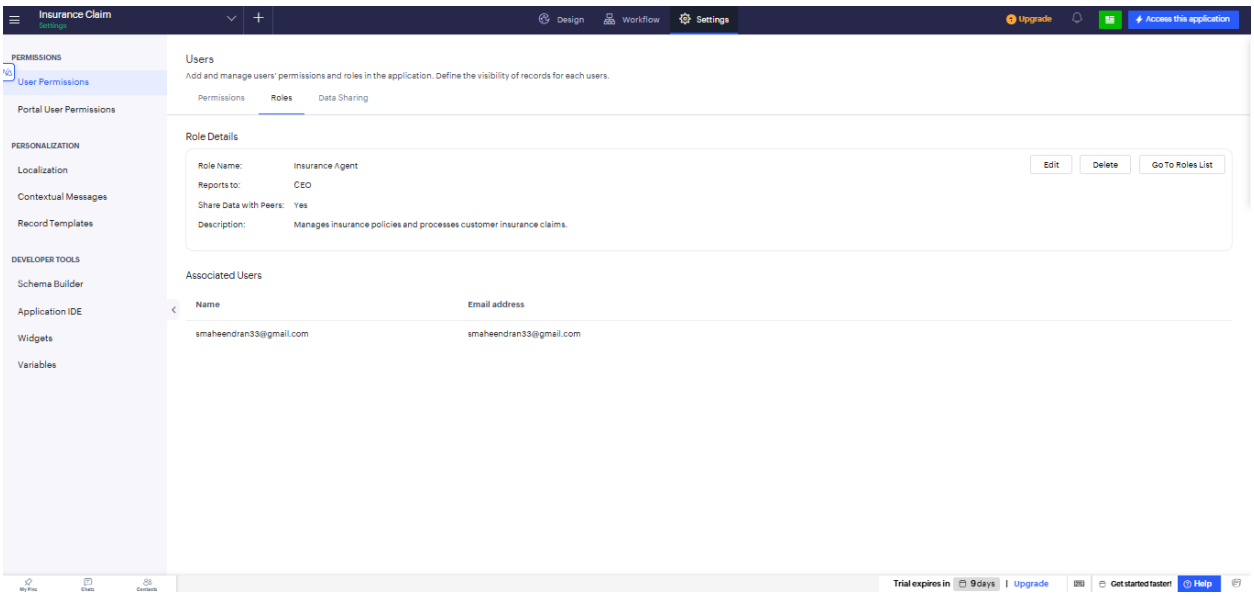

1. Open the Insurance Claim application in Zoho Creator.
2. Navigate to Settings → User Permissions.
3. Open the Roles section and identify the available roles.
4. Configure the `Administrator` role to manage application activities.
5. Configure the `Insurance Agent` role to manage policies and process insurance claims.
6. Configure the `Customer` role to access permitted customer-related features.
7. Navigate to the Permissions section.
8. Create `Insurance_Agent_Permissions` and configure the required access, view, and edit permissions.
9. Create `Customer_Permissions` and restrict access to only the required features.
10. Open the Data Sharing section and configure rules for sharing customer and policy records with authorized roles.
11. Enable the role hierarchy for the Customer Details, Insurance Claim, and Insurance Policy forms.
12. Navigate to Manage → Users and assign users to the appropriate application roles and permission sets.
13. Verify the assigned roles and test whether users can access only the features and records permitted to them.

Result:

User management and Role-Based Access Control (RBAC) were configured in the Zoho Creator Insurance Claim application. Roles, permission sets, role hierarchy, and data-sharing rules were set up to control user access according to their responsibilities. The Insurance Agent role assignment was verified successfully.
